

NAKITYO JOANITA

SYSTEMS SOFTWARE ENGINEER

CONTACT

- +8210-7553-6362
- nakityojoanita51@gmail.com
- Ulsan, South Korea

EDUCATION

2024 - 2026
Ulsan National Institute of
Science and Technology - UNIST

- Master of Science in
Computer Science and
Engineering (CSE)

2019 - 2024
MAKERERE UNIVERSITY

- Bachelor of Science in
Software Engineering (BSSE)

TECHNICAL SKILLS

- Rust programming
- C/C++ programming
- LLVM familiarity
- Web development (MERN stack)
- Linux
- Git

PROFILE

Systems Software Engineer with experience in systems security research, Rust systems programming, and secure software development. Passionate about designing secure, high-performance software and sharing knowledge through teaching and technology communities.

WORK EXPERIENCE

Computer Systems Security Lab (CSSL), UNIST Sep 2024 - 2026

Graduate Researcher & Teaching Assistant

- Conduct research in systems software and systems security, with a focus on isolating native libraries used by Rust applications.
- Design and implement compiler and runtime mechanisms using LLVM and Intel Memory Protection Keys (Intel MPK) to improve memory safety at FFI boundaries.
- Evaluate security, performance, and memory overhead through benchmarking and experimental analysis.
- Review and evaluate C/C++ programming assignments as a Teaching Assistant

Club Tangaza Limited

Dec 2023 - Jan 2024

Flexi Instructor

- Delivered training on Git, GitHub, Node.js, SQLite, REST API integration, and software development fundamentals.
- Mentored beginner developers through hands-on coding exercises.

Stanbic Bank Uganda

Sep 2023 - Dec 2023

Women in Tech Placement

- Earned the UiPath RPA Developer certification.
- Developed a bot for file transfer in UiPath Studio, increasing operational efficiency
